FENCING

Evergreen Landcare offers a complete fencing service for both agricultural and landscape fencing. Our fences are built to last so we use only new, high quality components and assess the quality of our work against NZ National Field Days Society Standards.

We use only H4 rated, copper chrome arsenate (CCA) treated fence posts and H3 CCA treated battens as well as galvanised staples and high tensile wire.

Attention to detail and quality workmanship are what our reputation is built on.

We have fencing teams available for work throughout New Zealand, each with over 30 years fencing experience. Each team member holds a NZQA Level 3 fencing qualification and a workplace First Aid certificate.

LANDSCAPING

Evergreen Landcare can supply and plant a wide range of exotic and native plant species suitable for a variety of locations. These include taller species suitable for riparian reserves, wetlands or forest rehabilitation through to lower growing shrubs, flaxes and grasses for height critical or low maintenance areas.

We can also design complete landscape solutions according to your criteria and objectives.

Site preparation can be tailored to individual client's needs. These could include spot spraying with broad spectrum herbicide or mechanical cultivation.
